🔗 Portfolio

📍 Caloocan, Philippines

SUMMARY

Results-driven IT professional with 7 years of combined experience in the IT and banking industries, specializing in Technical SEO management, web application development, project leadership, and operational optimization. Skilled in managing cross-functional teams, implementing scalable SEO strategies, and developing secure, high-quality web solutions that align with business goals. Experienced in technical site audits, on-page optimization, website performance improvements, indexing and crawlability management, and SEO-driven content strategies to enhance search visibility and user experience. Proven ability to bridge technical execution with business objectives, driving efficiency, digital growth, and long-term platform stability.

EDUCATION

Bachelors of Science In Business Administration

Polytechnic University of the Philippines

📅 2012 - 2017

📍 San Juan, Philippines

EXPERIENCE

Frontend Engineer | Technical SEO Engineer

Samsung R&D Institute Philippines (SRPH)

📅 April 2025 - May 2026

📍 Taguig, Philippines

- Led frontend modernization initiatives using React, TypeScript, and enterprise web technologies for globally distributed applications.
- Spearheaded gRPC integration with web applications, improving API response performance by 50% across production systems.
- Designed and implemented IndexedDB caching strategies, reducing API requests by 80% and significantly improving application responsiveness.
- Developed scalable frontend modules and reusable components following enterprise coding standards and architectural guidelines.
- Participated in frontend architecture discussions involving state management, routing strategies, API integration patterns, and application scalability.
- Reviewed, audited, and refactored AI-generated and legacy code to ensure maintainability, performance, security, and production readiness.
- Implemented GitHub Actions workflows for automated testing, quality checks, and deployment processes.
- Collaborated with global engineering teams to standardize codebases, improve documentation, and establish maintainable development practices.
- Assisted with localization and internationalization initiatives supporting multiple languages and regional deployments.
- Troubleshooted complex frontend issues and implemented long-term improvements to application stability and performance.

Senior Web Developer | IT Head | SEO Manager

Pulp Live World

📅 September 2023 - March 2025

📍 Quezon City, Philippines

- Designed, developed, and maintained 20+ production web applications using React, Next.js, TypeScript, Laravel, and modern frontend technologies.
- Established project architecture, application structure, routing patterns, API integration standards, and frontend development workflows.
- Built reusable UI components, shared modules, and scalable frontend solutions that accelerated development across multiple projects.
- Developed SSR and SEO-friendly Next.js applications focused on performance, maintainability, and user experience.
- Led frontend modernization efforts, implementing coding standards, linting, formatting, and development best practices.
- Leveraged AI-assisted development tools while conducting rigorous code reviews, refactoring, testing, and validation before production deployment.
- Managed CI/CD pipelines, automated deployments, environment configurations, and release processes using GitHub Actions.
- Administered Linux servers, DNS, SSL certificates, hosting environments, and production infrastructure.

- Collaborated with designers, content teams, and stakeholders to deliver responsive, accessible, and cross-browser compatible applications.
- Authored technical documentation, implementation guides, and development standards to support team scalability and knowledge sharing.
- Mentored developers and provided technical leadership on frontend architecture, application design, and engineering best practices.

Jr. Web Developer | Technical SEO Specialist

Hello Box

📅 April 2021 - July 2023

📍 Paranaque, Philippines

- Developed and maintained large-scale React-based web applications and marketing platforms.
- Created and deployed over 100 responsive landing pages while maintaining performance, accessibility, and cross-browser compatibility standards.
- Built reusable frontend components and modular page templates to improve development efficiency and maintain consistency.
- Collaborated with backend teams to integrate REST APIs and support dynamic content delivery.
- Reviewed AI-generated code suggestions and implemented necessary refactoring, testing, and optimization before production deployment.
- Refactored and translated over 3,000 lines of legacy code, significantly improving maintainability and team collaboration.
- Improved application performance through caching, image optimization, lazy loading, and code-splitting strategies.
- Assisted in build configuration, deployment processes, and frontend troubleshooting across multiple production environments.
- Participated in technical reviews and frontend improvements focused on scalability, maintainability, and long-term sustainability.

Web Developer

Alpha Ran Private Server

📅 2017 - 2018

📍 Remote

- Set up web servers and control panels specifically for games, with a specialization in Ran Online.
- Maintain code functionality and reliability to ensure smooth operation of web applications.
- Debug and fix coding issues to improve performance and user experience.
- Add or remove features as required, enhancing the functionality and usability of web applications.
- Proficient in programming languages such as HTML, CSS, JavaScript, and PHP.
- Skilled in server-side scripting and database management.
- Experienced in troubleshooting and resolving technical issues related to web development.
- Strong foundation in web development principles and best practices.
- Detail-oriented and committed to delivering high-quality results within project deadlines.
- Continuously update knowledge and stay abreast of latest web development trends and technologies.
